P0404 □ SYMPTOMS AND CORRECT  
SOLUTION □ - Fault code OBD2

Replaced My Sprinter EGR Valve p0404 Egr  
Error Code P0404 P0404 is a generic OBD II  
fault code that indicates that there is an  
issue with the Exhaust Gas Recirculation  
(EGR) circuit. The Engine Control Module  
(ECM) has detected that the EGR circuit is  
either out of range or not functioning  
properly. The purpose of the EGR system  
is to burn fuel more efficiently. P0404 -  
Exhaust gas recirculation (EGR) system  
range ... Often times code P0404 does not  
actually indicate that there is something

wrong with the EGR valve itself, but actually that the EGR sensor is telling your PCM that the proper amount of EGR needed to flow back into your cylinders and cool them is not present. P0404 - Meaning, Causes, Symptoms, & Fixes | FIXD Automotive Diagnostic Trouble Code (DTC) P0404 stands for Exhaust Gas Recirculation Circuit Range/Performance Problem. It is a generic OBD trouble code that activates if the powertrain control module (PCM) detects erratic Exhaust Gas Recirculation (EGR) valve performance. Code P0404 activates when the car computer detects erratic EGR valve performance. P0404 Code: Exhaust Gas Recirculation Circuit Range ... P0404 is a diagnostic trouble code (DTC) for "Exhaust Gas Recirculation Circuit Range/Performance". This can happen for multiple reasons and a mechanic needs to diagnose the specific cause for this code to be triggered in your situation. Our certified mobile mechanics can come to your home or office to perform the Check Engine Light diagnostic. Once we are able to diagnose the problem, you will be provided with an upfront quote for the recommended fix and receive \$20.00 off

as a credit ... P0404 OBD-II Trouble Code: Exhaust Gas Recirculation ... The Error Code P0404 means the position of the EGR valve is above or below range. Meaning, if the PCM determines that the valve should be operating, but feedback circuit system shows that it is closed, it will trigger the error code. The code is also triggered when the PCM determines the valve should be closed, and the feedback shows it's open. Error Code P0404 - Exhaust Gas Recirculation Circuit Range/Performance Trouble Code P0404 would signify that your EGR valve is performing in an unusual way. There are a lot of possible causes for this problem. You may have a lot of carbon accumulation in your EGR valve. Perhaps your EGR valve is not moving smoothly for this reason or another reason. P0404: Exhaust Gas Recirculation Circuit Range/Performance ... While there are several issues that can throw the P0404 code in the Town and Country, the most common issue is either going to be carbon buildup on the EGR valve, the EGR valve itself (going bad), or wiring issues. P0404 Symptoms: Chrysler Town and Country Chrysler Town and Country P0404: EGR Circuit → Range ... This video is to help with troubleshooting

P0404 and P0405 EGR codes. At the end of the video I show the disassembled EGR valve and the root cause of the pro... P0404, P0405 EGR Codes - YouTube If you have a P0404, then the EGR valve is likely an electrically controlled EGR valve instead of a vacuum controlled EGR valve. Also, the valve will usually have a feedback system built into it that informs the PCM (Powertrain Control Module) what position the valve is in; open, closed, or somewhere in between. P0404 Exhaust Gas Recirculation ... - DTC Codes Car Repair With the EGR valve fully blanked, the JTD 8 valve engines record the fault code but don't illuminate the EML. JTD 16 valve engines record the fault code and illuminate the EML. This has been discussed many times in Stilo section of the forum, and tested on my own Stilo JTD 8v. With an EGR valve blanking plate fitted, it records the code. Without the blanking plate, it doesn't. Technical: Fault code P0404 EGR - The FIAT Forum While there are several issues that can throw the P0404 code in the Caravan, the most common issue is either going to be carbon buildup on the EGR valve, the EGR valve itself (going bad), or wiring issues. P0404

[Technical: Fault code P0404 EGR - The FIAT Forum](#)

P0404 is a generic OBD II fault code that indicates that there is an issue with the Exhaust Gas Recirculation (EGR) circuit. The Engine Control Module (ECM) has detected that the EGR circuit is either out of range or not functioning properly. The purpose of the EGR system is to burn fuel more efficiently.

#### **fault code p0404 - forum about car parts and car advices**

The Error Code P0404 means the position of the EGR valve is above or below range. Meaning, if the PCM determines that the

valve should be operating, but feedback circuit system shows that it is closed, it will trigger the error code. The code is also triggered when the PCM determines the valve should be closed, and the feedback shows it's open.

Often times code P0404 does not actually indicate that there is something wrong with the EGR valve itself, but actually that the EGR sensor is telling your PCM that the proper amount of EGR needed to flow back into your cylinders and cool them is not present.
