Speech [The Women's Leadership Conference : New Heights, New Dimensions ... 2002] Hachette Books  
A powerful call to action for achieving equality in leadership. Women make up fewer than ten percent of national leaders worldwide, and behind this eye-opening statistic lies a pattern of unequal access to power. Through conversations with some of the world's most powerful and interesting women—including Jacinda Ardern, Hillary Rodham Clinton, Christine Lagarde, Michelle Bachelet, and Theresa May—*Women and Leadership* explores gender bias and asks why there aren't more women in leadership roles. Speaking honestly and freely, these women talk about having their ideas stolen by male colleagues, what it's like to be called fat or a slut in the media, and what things they wish they had done differently. The stories they tell reveal vividly how gender and sexism affect perceptions of women as leaders. Using current research as a starting point, Julia Gillard and Ngozi Okonjo-Iweala—both political leaders in their own countries—analyze the lived experiences of these women leaders. The result is a rare insight into life as a leader and a powerful call to arms for women everywhere.

"What is women's empowerment, and how and why does it matter for women's health? Despite the rise of a human rights-based approach to women's health and increasing awareness of the synergies between women's health and empowerment, a lack of consensus remains as to how to measure empowerment and successfully intervene in ways that improve health. Women's Empowerment and Global Health provides thirteen detailed, multidisciplinary case studies from across the globe and through the course of a woman's life to show how science

and advocacy can be creatively merged to enhance the agency and status of women. Accompanying short videos provide background about programs on the ground in India, the United States, Mexico, Nicaragua, Zimbabwe, and South Africa. *Women's Empowerment and Global Health* explores the promises and limits of programmatic, scientific, and rights-based work in real-world settings and provides the next generation of researchers and practitioners, as well as students in global and public health, sociology, anthropology, women's studies, law, business, and medicine, with cutting edge and inspirational examples of programs that point the way toward achieving women's equality and fulfilling the right to health."--Provided by publisher.

The bestselling motivational guide that TheAtlantic.com calls "a rallying cry for women to get the money they deserve." Why are women so often overlooked and underpaid? What are the real reasons men get raises more often than women? How can women ask for--and actually get--the money, the job, the recognition they deserve? Prompted by her own experience as cohost of *Morning Joe*, Mika Brzezinski asked a wide range of successful women to share the critical lessons they learned while moving up in their fields. Power players such as Facebook's Sheryl Sandberg, Senator Elizabeth Warren, Harvard's Victoria Budson, comedian Susie Essman, and many more shared their surprising personal stories. They spoke candidly

about why women are paid less and the pitfalls women face--and play into. Now expanded to address gender dynamics in the #MeToo era, *Know Your Value* blends compelling personal stories with the latest research on why many women don't negotiate their compensation, why negotiating aggressively usually backfires, and what can be done about it. For any woman who has ever wondered if her desire to be liked can be a liability (yes), if there is a way to reclaim her contribution after it's been co-opted in a meeting (yes), and if there are strategies men use to get ahead that women should too (yes!), *Know Your Value* provides vital advice to help women be their own best advocates. *FutureVisions* World Bank Publications

The feminist women's health movement of the 1960s and 1970s is credited with creating significant changes in the healthcare industry and bringing women's health issues to public attention. Decades later, women's health issues are more visible than ever before, but that visibility is made possible by a process of depoliticization. *The Vulnerable Empowered Woman* assesses the state of women's healthcare today by analyzing popular media representations—television, print newspapers, websites, advertisements, blogs, and memoirs—in order to understand the ways in which breast cancer, postpartum depression, and cervical cancer are discussed in American public life. From narratives about prophylactic mastectomies to young girls receiving a vaccine for sexually transmitted disease, the representations of women's health today form a single restrictive identity: the vulnerable empowered woman. This identity defuses feminist notions of collective empowerment and social

change by drawing from both postfeminist and neoliberal ideologies. The woman is vulnerable because of her very femininity and is empowered not to change the world, but to choose from among a limited set of medical treatments. The media's depiction of the vulnerable empowered woman's relationship with biomedicine promotes traditional gender roles and affirms women's unquestioning reliance on medical science for empowerment. The book concludes with a call to repoliticize women's health through narratives that can help us imagine women—and their relationship to medicine—differently. *Whither Women: A Shift from Endowment to Empowerment* Golden Brick Road Publishing House

*Junctures in Women's Leadership: Health Care and Public Health* offers an eclectic compilation of case studies of women leaders in public health and health care over nearly 150 years. Extraordinarily relevant to current public discourse, topics include: the COVID-19 pandemic, health disparities, disease prevention and the Affordable Care Act. Their leadership lessons can be applied to a broad array of disciplines.

In the early 1990s international population policy faced a crisis--it was being attacked from the left and the right, from inside and outside, for a range of failings--of ethics, fact, method, and vision. The 1994 International Conference on Population and Development, held in Cairo, provided a new policy consensus that helped to overcome this crisis. Starting from the question of how the transition from population control to women's empowerment was formulated as an international consensus, *The Cairo*

Consensus maps the discourses, technical practices, and institutional practices that made this transition possible and stable. Demographic surveys in particular emerge as a crucial, though often overlooked, mechanism for policy production and stability. Using detailed empirical material, including over 30 interviews, combined with cutting edge social and political theory, Saul Halfon offers a new look at population policy that will interest scholars of science and technology, international studies, women's studies, development studies, and post-colonial theory.

The empowerment of women by their increased participation in all aspects of political, social and economic life has become one of the major goals of democratic and participatory movements, as well as women's organizations, throughout the world. This book examines the vital interaction of women's increasing participation, decision-making and empowerment. Marilee Karl also examines the legal, economic and social obstacles faced by women around the world. She provides vivid examples of women responding to those challenges. Beyond offering an understanding of what participation and empowerment are and can be, this book seeks to promote women's participation whether at the grassroots or at national and international levels. The book looks at the growing involvement of women in different organizations, politics and public life, development programmes and international decision-making. It outlines the strategies, mechanisms and tools that women are using for their empowerment and explains new priorities and perspectives that women are bringing to today's key issues.

*Dig Where You Are* is about seven remarkable men and women who have solved some of the biggest challenges facing our societies today. From the slums of Mumbai, the villages of Tibet and northeast Thailand, the inner cities of Philadelphia and San Francisco, and a ghetto outside Stockholm, *Dig Where You Are* tells of an artist, a surgeon, a teacher, a criminologist, an economist, a community organizer and a general physician each of whom saw a way beyond suffering and injustice, took responsibility for the wellbeing of others and ended up transforming lives and communities across the world. Who are they and how did they do it? These are the stories of everyday people armed with a belief in the potential of others, a passion to change things for the better and a healthy dose of grit and persistence. Their lives are an inspiration for anyone who wants to make a difference but is not sure how to start. They remind us that it is small groups of committed and caring people-not large institutions and governments-who really change the world. Book jacket.

There is general consensus among the international population community that the commitment achieved at the International Conference on Population and Development (Cairo, 1994) to womens empowerment, along with the related goals of improving womens reproductive health and securing their reproductive rights, represented a paradigm shift in the discourse about population and development, even though there are differences in view whether this is a positive change or not.

But while the rhetoric about womens empowerment is pervasive, the concept remains ill-defined, and its relationship to demographic processes has not been well articulated, either theoretically or empirically. This book brings together leading researchers and policy advocates to explore whether the concept of womens empowerment is indeed useful for an understanding of key demographic processes. Its contributors identify new directions for demographic research from the analysis of available data that measure womens empowerment, and point to the implications for population-related policies. Demographic research has focused relatively little to date on gender, let alone the question of power. Yet critiques of available data argue that traditional womens-status indicators, such as education and employment, are often not sensitive enough to capture the nuances of gender power relations and the ways in which they govern womens and mens reproductive behaviour. This book moves forward to the complex task of conceptualizing, measuring, and analysing womens empowerment. In laying this groundwork, it provides critically important insights into the causes and consequences of population change, including migration. The book combines conceptual and empirical research with policy directions and considers the relevance of economic, social, and cultural contexts for the health and wellbeing of women, adolescents, and children. The countries under study are of both the North and the South. This book represents state-of-the-art knowledge on the two-way linkages between womens empowerment and demographic processes.

*This Is How We Rise* Thomas Nelson

This empowering resource engages women in an interactive exploration of the challenges and opportunities on the frontier of women's spiritual leadership. Through the voices of North American women representing a matrix of diversity ethnically, spiritually, religiously, generationally and geographically women will be inspired to new expressions of their own personal leadership and called into powerful collaborative action."

A bold and inspiring memoir and manifesto from a renowned voice in the women's leadership movement who shows women how to cultivate the single skill they really need in order to thrive: the ability to let go. Once the poster girl for doing it all, after she had her first child, Tiffany Dufu struggled to accomplish everything she thought she needed to in order to succeed. Like so many driven and talented women who have been brought up to believe that to have it all, they must do it all, Dufu began to feel that achieving her career and personal goals was an impossibility. Eventually, she discovered the solution: letting go. In *Drop the Ball*, Dufu

recounts how she learned to reevaluate expectations, shrink her to-do list, and meaningfully engage the assistance of others—freeing the space she needed to flourish at work and to develop deeper, more meaningful relationships at home. Even though women are half the workforce, they still represent only eighteen per cent of the highest level leaders. The reasons are obvious: just as women reach middle management they are also starting families. Mounting responsibilities at work and home leave them with no bandwidth to do what will most lead to their success. Offering new perspective on why the women's leadership movement has stalled, and packed with actionable advice, Tiffany Dufu's *Drop the Ball* urges women to embrace imperfection, to expect less of themselves and more from others—only then can they focus on what they truly care about, devote the necessary energy to achieving their real goals, and create the type of rich, rewarding life we all desire.
