Getting More Harper Collins

At last, here is a book that shows women how to recognize the Shadow Negotiation -- in which the unspoken attitudes, hidden assumptions, and conflicting agendas that drive the bargaining process play out -- and how to use that knowledge to their advantage. Each time people bargain over

issues -- a promotion, a contract with a new client, a bigger role in decision-making -- a parallel negotiation unfolds beneath the surface of the "formal" discussion. Bargainers constantly maneuver to determine whose interests and needs will hold sway, whose opinions will matter, and how cooperative each person will be in reaching an agreement. How the issues are resolved hangs on the actions people take in the shadow negotiation, yet it is in this shadow negotiation that women most often run into trouble. The most productive negotiations take place when strong advocates can connect with each other. Good results depend equally on a bargainer's positioning her ideas for a fair hearing and on being open to the other side's point of view. But traditionally women have not fared well on either front. Often, they let negotiable moments slip by and take the first "no" as a final answer, or their efforts to be responsive to the other side's position are interpreted as accommodation. As a result, women can come away from negotiations with fewer dollars, perks, plum assignments, or less say in decision-making than men. To negotiate effectively, women must pay attention to acts of self-sabotage as well as to the moves others make in the shadow negotiation. By bargaining more strategically, women can establish the terms of their advocacy, their voice, and at the same time encourage the open communication essential to a collaborative discussion in which not only acceptable, but creative, agreements can be worked out. Written by Deborah M. Kolb and Judith Williams, two authorities in the field, *The Shadow Negotiation* shows women a whole new way to think about the negotiation process. Kolb and Williams identify the common stumbling blocks that women encounter and present a game plan for turning their particular strengths to their advantage. Based on extensive interviews with hundreds of business-women, *The Shadow Negotiation* provides women with a clear, insightful guide to the hidden machinations that are at work in

every bargaining situation.

In *Negotiating Rationally*, Max Bazerman and Margaret Neale explain how to avoid the pitfalls of irrationality and gain the upper hand in negotiations. For example, managers tend to be overconfident, to recklessly escalate previous commitments, and fail to consider the tactics of the other party.

Drawing on their research, the authors show how we are prisoners of our own assumptions. They identify strategies to avoid these pitfalls in negotiating by concentrating on opponents' behavior and developing the ability to recognize individual limitations and biases. They explain how to think rationally about the choice of reaching an agreement versus reaching an impasse. A must read for business professionals.

Negotiate to Win John Wiley & Sons

This fine blend of Harvard scholarship and seasoned judgment is really two books in one. The first develops a sophisticated approach to negotiation for executives, attorneys, diplomats -- indeed, for anyone who bargains or studies its challenges. The second offers a new and compelling vision of the successful manager: as a strong, often subtle negotiator, constantly shaping agreements and informal understandings throughout the complex web of relationships in an organization. Effective managers must be able to reach good formal accords such as contracts, out-of-court settlements, and joint venture agreements. Yet they also have to negotiate with others on whom they depend for results, resources, and authority. Whether getting fuller support from the marketing department, hammering out next year's budget, or winning the approval for a new line of business, managers must be adept at advantageously working out and modifying understandings, resolving disputes, and finding mutual gains where interests and perceptions conflict. In such situations, *The Manager as Negotiator* shows how to creatively further the totality of one's interests, including important relationships -- in a way that Richard Walton, Harvard Business School Professor of Organizational Behavior, describes as "sensitive to the nuances of negotiating in organizations" and "relentless and skillful in making systematic sense of the process." This book differs fundamentally from the recent spate of negotiation handbooks that tend to espouse one of two approaches: the competitive ("Get yours and most of theirs, too") or the cooperative ("Everyone can always win"). Transcending such cynical and naive views, the authors develop a comprehensive approach, based on strategies and tactics for productively managing the tension between the cooperation and competition that are both inherent in bargaining. Based on the authors' extensive experience with hundreds of cases, and peppered with a number of wide-ranging examples, *The Manager as Negotiator* will be invaluable to novice and experienced negotiators, public and private managers, academics, and anyone who needs to know the state of the art in this important field.

Beyond Winning John Wiley & Sons

The Conscience Code is a practical guide to creating workplaces where everyone can thrive. Shell created this book?to point to a better path: recognize that these conflicts are coming, learn to spot them, then follow a research-based, step-by-step approach for resolving them skillfully. By committing to the Code, you can replace regret with long-term career success as a leader of conscience. In *The Conscience Code*, Shell shares tips and facts that: Solves a crucial problem faced by professionals everywhere: What should they do when they are asked to compromise their core values to achieve organizational goals? Teaches readers to recognize and overcome the five organizational forces that push people toward actions they later regret. Bargaining with the Devil Cambridge Scholars Publishing

In the global marketplace, negotiation frequently takes place across cultural boundaries, yet negotiation theory has traditionally been grounded in Western culture. This book, which provides an in-depth review of the field of negotiation theory, expands current thinking to include cross-cultural perspectives. The contents of the book reflect the diversity of negotiation—research—negotiator cognition, motivation, emotion, communication, power and disputing, intergroup relationships, third parties, justice, technology, and social dilemmas—and provides new insight into negotiation theory, questioning assumptions, expanding constructs, and identifying limits not apparent from working exclusively within one culture. The book is organized in three sections and pairs chapters on negotiation theory with chapters on culture. The first part emphasizes psychological processes—cognition, motivation, and emotion. Part II examines the negotiation process. The third part emphasizes the social context of negotiation. A final chapter synthesizes the main themes of the book to illustrate how scholars and practitioners can capitalize on the synergy between culture and negotiation research.
