A NEW YORK TIMES BESTSELLER An Esquire Best Book of 2017 Remember when presidents spoke in complete sentences instead of in unhinged tweets? Former Obama speechwriter David Litt does. In his comic, coming-of-age memoir, he takes us back to the Obama years – and charts a path forward in the age of Trump. More than any other presidency, Barack Obama's eight years in the White House were defined by young people – twenty-somethings who didn't have much experience in politics (or anything else, for that matter), yet suddenly found themselves in the most high-stakes office building on earth. David Litt was one of those twenty-somethings. After graduating from college in 2008, he went straight to the Obama campaign. In 2011, he became one of the youngest White House speechwriters in history. Until leaving the White House in 2016, he wrote on topics from healthcare to climate change to criminal justice reform. As President Obama's go-to comedy writer, he also took the lead on the White House Correspondents' Dinner, the so-called "State of the Union of jokes." Now, in this refreshingly honest memoir, Litt brings us inside Obamaworld. With a humorists' eye for detail, he describes what it's like to accidentally trigger an international incident or nearly set a president's hair aflame. He answers questions you never knew you had: Which White House men's room is the classiest? What do you do when the commander in chief gets your name wrong? Where should you never, under any circumstances, change clothes on Air Force One? With nearly a decade of stories to tell, Litt makes clear that politics is completely, hopelessly absurd. But it's also important. For all the moments of chaos, frustration, and yes, disillusionment, Litt remains a believer in the words that first drew him to the Obama campaign: "People who love this country can change it." In telling his own story, Litt sheds fresh light on his former boss's legacy. And he argues that, despite the current political climate, the politics championed by Barack Obama will outlive the presidency of Donald Trump. Full of hilarious stories and told in a truly original voice, Thanks, Obama is an exciting debut about what it means – personally, professionally, and politically – to grow up.

A range of perspectives on the complex political, philosophical, and pragmatic implications of opening research and scholarship through digital technologies. The Open Access Movement proposes to remove price and permission barriers for accessing peer-reviewed research work--to use the power of the internet to duplicate material at an infinitesimal cost-per-copy. In this volume, contributors show that open access does not exist in a technological vacuum; there are complex

political, philosophical, and pragmatic implications for opening research through digital technologies. The contributors examine open access across spans of colonial legacies, knowledge frameworks, publics and politics, archives and digital preservation, infrastructures and platforms, and global communities.

Local budgeting serves important functions that include setting priorities, planning, financial control over inputs, management of operations and accountability to citizens. These objectives give rise to technical and policy issues that require open discussion and debate. The format of the budget document can facilitate this debate. This book provides a comprehensive treatment of all aspects of local budgeting needed to develop sound fiscal administration at the local level. Topics covered include fiscal administration, forecasting, fiscal discipline, fiscal transparency, integrity of revenue administration, budget formats, and processes including performance budgeting, and capital budgeting.

Appropriate for courses in Auditing and Special Topics in Accounting at the college or university level. Auditing is a second-year (upper-level) course directed at students in pursuit of a professional accounting designation-CA, GGA, and CMA. This innovative and easy-to-understand bestseller offers a mixture of auditing theory and practical applications for those who will work for auditing firms. It provides thorough coverage of the entire audit process, taking the reader step-by-step through an audit cycle, then showing how the process relates to all audit cycles. Reflecting the reality of today's working world, particularly the impact of technology on auditing procedures and techniques, the text has been thoroughly revised and updated, and is completely oriented to the practical application of computers in the field of auditing. It addresses five major issues in this area that have imposed change on the auditing environment: use of computer systems by audit clients; types of computer-based systems used by audit clients; form of working papers used in general practice; student knowledge of automated systems; and integration of automated systems into the review questions, problems, and cases. Students will learn not only auditing procedures, but also how to analyze data.

This book, by A. Premchand, seeks to bridge fiscal economics and government accounting. It examines historical developments, ingredients of existing systems, features of accounting standards, and other issues that governments must address to perform their tasks economically and efficiently. Readers gain insights into institutional linkages and the role of electronic technology. Arguing that government accounting systems are too important to be left to accountants alone, the book presents an interdisciplinary approach that goes beyond adapting commercial accounting formats to governments.

Mobile Museums presents an argument for the importance of circulation in the study of museum collections, past and present. It brings together an impressive array of international scholars and curators from a wide variety of disciplines – including the history of science, museum anthropology and postcolonial history – to consider the mobility of collections. The book combines historical perspectives on the circulation of museum objects in the past with contemporary accounts of their re-mobilisation, notably in the context of Indigenous community engagement. Contributors seek to explore processes of circulation historically in order to re-examine, inform and unsettle common assumptions about the way museum collections have evolved over time and through space. By foregrounding questions of circulation, the chapters in Mobile Museums collectively represent a fundamental shift in the understanding of the history and future uses of museum collections. The book addresses a variety of different types of collection, including the botanical, the ethnographic, the economic and the archaeological. Its perspective is truly global, with case studies drawn from South America, West Africa, Oceania, Australia, the United States, Europe and the UK. Mobile Museums helps us to understand why the mobility of museum collections was a fundamental aspect of their history and why it continues to matter today. Praise for Mobile Museums 'This book advances a paradigm shift in studies of museums and collections. A distinguished group of contributors reveal that collections are not dead assemblages. The nineteenth and twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us much about colonialism, travel and the history of knowledge – and have implications for the remobilisation of museums in the future.' – Nicholas Thomas, University of Cambridge 'The first major work to examine the implications and consequences of the migration of materials from one scientific or cultural milieu to another, it highlights the need for a more nuanced understanding of collections and offers insights into their potential for future re-mobilisation.' – Arthur MacGregor

In 2011 the Philippines surpassed India to become what the New York Times referred to as "the world's capital of call centers." By the end of 2015 the Philippine call center industry employed over one million people and generated twenty-two billion dollars in revenue. In *A Nation on the Line* Jan M. Padios examines this massive industry in the context of globalization, race, gender, transnationalism, and postcolonialism, outlining how it has become a significant site of efforts to redefine Filipino identity and culture, the Philippine nation-state, and the value of Filipino labor. She also chronicles the many contradictory effects of call center work on Filipino identity, family, consumer culture, and sexual politics. As Padios demonstrates, the critical question of call centers does not merely expose the logic of transnational capitalism and the legacies of colonialism; it also problematizes the process of nation-building and peoplehood in the early twenty-first century.

Fragile lives in fragile ecosystems: Feeding the world's poor from neglected rice ecosystems was the theme of the 1995 International Rice Research Conference. During the February meeting, participants assessed progress in rice research and identified new research approaches for reducing constraints and improving productivity and sustainability of less favored and fragile rice producing areas - these are the upland, rainfed lowland, and flood-prone ecosystems.
