To Give a Future with Hope Lippincott Williams & Wilkins
 Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

1 Emerging Themes 2012 Springer

Drawing from and expanding on the themes of Michelle Alexander's acclaimed best-seller, *The New Jim Crow*, this in-depth guide provides a launching pad for groups wishing to engage in deep, meaningful dialogue about race, racism, and structural inequality in the age of mass incarceration. The Study Guide and Call to Action spans the entirety of *The New Jim Crow*, engaging the critical questions of how we managed to create, nearly overnight, a penal system unprecedented in world history, and how that system actually functions - as opposed to the way it is advertised. This important new resource also challenges us to search for and admit the truth about ourselves, our own biases, stereotypes, and misconceptions, and the many ways in which we might actually be part of the problem.

Addiction is a powerful and destructive condition impacting large portions of the population around the world. While typically associated with substances, such as drugs and alcohol, technology and internet addiction have become a concern in recent years as technology use has become ubiquitous.

Psychological, Social, and Cultural Aspects of Internet Addiction is a critical scholarly resource that sheds light on the relationship between psycho-social variables and internet addiction. Featuring coverage on a broad range of topics such as human-computer interaction, academic performance, and online behavior, this book is geared towards psychologists, counselors, graduate-level students, and researchers studying psychology and technology use.

Lord of the Flies Routledge

The active economy incorporates several disciplines that include sport performance, sport business, recreation, tourism, physical activity, urban planning, leisure, and health and wellness, among others. From an academic and policy perspective, these disciplines are typically viewed as distinct, with only limited spillover, and consequently, limited research explores the interaction between them. However, each individual sector can be studied as interdependent rather than autonomous. By viewing the various sectors as part of a complex active ecosystem, policymakers and practitioners are better positioned to shape broad opportunities while maximizing the community value of sports, recreation, and wellness. Understanding the Active Economy and Emerging Research on the Value of Sports, Recreation, and Wellness provides a new view on the fields of sport, recreation, and health and wellness by exploring the interaction between these traditional separate disciplines. It includes sub-groups of the active economy such as health and wellness, active apparel and accessories, active equipment and

sports betting but also ties in sub-groups from the ancillary sector such as tourism, design and infrastructure, media and content, and professional services. This book is intended for professionals, educators, and researchers working in the fields of sports, recreation, and health and wellness, as well as economists, executives, managers, practitioners, stakeholders, researchers, academicians, and students interested in how sports, recreation, and wellness operate in the active economy.

#1 NEW YORK TIMES BESTSELLER • ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME The extraordinary, beloved novel about the ability of books to feed the soul even in the darkest of times. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist—books. With the help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of *I Am the Messenger*, has given us one of the most enduring stories of our time. "The kind of book that can be life-changing." —The New York Times "Deserves a place on the same shelf with *The Diary of a Young Girl* by Anne Frank." —USA Today DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.

Challenges, Opportunities and Research Agenda IGI Global

This anthology presents a new study of the worldwide African diaspora by bringing together diverse, multidisciplinary scholarship to address the connectedness of Black subject identities, experiences, issues, themes, and topics, applying them dynamically to diverse locations of the Blackworld—Latin America, the Caribbean, Africa, and the United States. The book underscores three dimensions of African diaspora study. First is a global approach to the African diaspora, showing how globalism underscores the distinctive role that Africa plays in contributing to world history. Second is the extension of African diaspora study in a geographical scope to more robust inclusions of not only the African continent but also to uncharted paths and discoveries of lesser-known diaspora experiences and identities in Latin America and the Caribbean. Third is the illustration of universal unwritten cultural representations of humanities in the African diasporas that show the distinctive humanities' disciplinary representations of Black diaspora imaginaries and subjectivities. The contributing authors inductively apply these themes to focus the reader's attention on contemporary localized issues and historical arenas of the African diaspora. They engage their findings to critically analyze the broader norms and dimensions that characterize a given set of interrelated criteria that have come to establish parameters that increasingly standardize African diaspora studies.

This book examines prominent issues in the Emerging Markets

(EM) from a variety of disciplines in order to make useful societal contributions through knowledge exchange. EMs offer enormous opportunities, but realizing them is both challenging and risky due to inherent uncertainties of such markets. EM's also have unique characteristics that makes them different from developed countries. This causes implications for both theory and practice. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. This book investigates problems specific to emerging markets, and identifies new theoretical constructs, hypotheses (re)development, and emphasizes institutional contexts. The chapters in this book establish new conceptual and theoretical paradigms from multidisciplinary perspectives concentrated in the areas of information systems, electronic government, and digital and social media matters. The book focuses on topics in these areas such as digital enterprises, sustainability, telemedicine, and Information Communication Technology (ICT) and surveys the potential challenges and opportunities that may arise. These concepts and topics covered in this book are vital for making the global economy more equitable and sustainable.

Ever notice that all watch ads show 10:10 as the time? Or that all fast-food restaurants use red or yellow in their logos? Or that certain stores are always having a sale? You may not be aware of these details, yet they've been influencing you all along. Every time you purchase, swipe, or click, marketers are able to more accurately predict your behavior. These days, brands know more about you than you know about yourself. Blindsight is here to change that. With eye-opening science, engaging stories, and fascinating real-world examples, neuroscientist Matt Johnson and marketer Prince Ghuman dive deep into the surprising relationship between brains and brands. In *Blindsight*, they showcase how marketing taps every aspect of our mental lives, covering the neuroscience of pain and pleasure, emotion and logic, fear and safety, attention and addiction, and much more. We like to think of ourselves as independent actors in control of our decisions, but the truth is far more complicated. *Blindsight* will give you the ability to see the unseeable when it comes to marketing, so that you can consume on your own terms. On the surface, you will learn how the brain works and how brands design for it. But peel back a layer, and you'll find a sharper image of your psychology, reflected in your consumer behavior. This book will change the way you view not just branding, but yourself, too.
