In this book, Mark Di Ionno invites you to join him in discovering New Jersey's rich and varied coastal heritage. He'll take you on a personal tour to explore the Sandy Hook Lighthouse and Spermaceti Cove Station, admire offbeat collections of saltwater taffy boxes and sand art in Atlantic City, spend an afternoon at Brigantine and unravel the legend of Captain Kidd, marvel at the skills of Tuckertons boatbuilders, discover New Jersey's own version of the Boston Tea Party in Greenwich, and find inspiration at Ocean Grove, a Methodist meeting place.

In *Backroads, New Jersey*, Di Ionno leads readers off the congested interstates with their commonplace scenery to the seldom-explored secondary roads, where the real life of the state can be found. These inter-county or 500 series roads are a 6,788-mile network of mostly one-lane highways. Marked by blue-and-yellow five-sided shields bearing county names, they make up more than 20 percent of New Jersey's public roads. They are never the fastest or most direct way to get anywhere, but when you break out of the towns and hit the country, they are a

pleasure to drive.

Though the American beach is now one of the most commercialized, contested, and engineered places on the planet, few people visited it or called it home at the beginning of the nineteenth century. By the twentieth century, the American beach had become the summer encampment of presidents, a common destination for millions of citizens, and the site of rapidly growing beachfront communities. Shipwrecked tells the story of this epic transformation, arguing that coastal shipwrecks themselves changed how Americans viewed, used, and inhabited the shoreline. Drawing on a broad range of archival material--including logbooks, court cases, personal papers, government records, and cultural ephemera--Wells examines how shipwrecks

laid the groundwork for the beach tourism industry that would transform the American beach from coastal frontier to oceanfront playspace, spur substantial state and private investment alongshore, reshape popular ideas about the coast, and turn the beach into a touchstone of the American experience.

This book is a result of the authors' more than 40 years of study on the behavior, populations, and heavy metals in the colonial waterbirds nesting in Barnegat Bay and the nearby estuaries and bays in the Northeastern United States. From Boston Harbor to the Chesapeake, based on longitudinal studies of colonial waterbirds, it provides a clear pictu

Description: literary trip along the Jersey Shore.

**Proceedings of The Academy of Natural Sciences (Part III - - Sept.-Dec., 1900)** UNC Press Books

The Jersey Shore evokes images of boardwalks and beach resorts, but its beginnings were far different. In the mid-nineteenth century, visionary entrepreneurs transformed the sleepy agrarian and maritime communities of the Garden State coast with a series of energetic new visitors and venues. Artists, politicians, athletes, entertainers and ordinary residents all played a hand in revitalizing the region. Major development of resorts began in Atlantic City in 1854, and it grew into "America's Favorite Playground." Joel Hayward was principally responsible for the formation of Ocean County, and the Albert brothers popularized Pinelands folk music. In the twentieth century, construction became more residential, and beloved businesses like the Smithville Inn started to cater to long-term patrons. New

Jersey historian Randall Gabrielan traces the stories of the people who turned the Jersey Shore into the summer and residential destination that it is today.
