South Asian Transnationalisms explores encounters in twentieth century South Asia beyond the conventional categories of center and periphery, colonizer and colonized. Considering the cultural and political exchanges between artists and intellectuals of South Asia with counterparts in the

United States, continental Europe, the Caribbean, and East Asia, the contributors interrogate the relationships between identity and agency, language and space, race and empire, nation and ethnicity, and diaspora and nationality. This book deploys transnational syntaxes such as cinema, dance, and literature to reflect on social, technological, and political change. Conceiving of the transnational as neither liberatory nor necessarily hegemonic, the authors seek to explore the contradictions, opportunities, disjunctions, and exclusions of the vexed experience of globalization in South Asia. This book was published as a special issue of South Asian History and Culture.

Fiftieth anniversary reissue of the founding media studies book that helped establish media art as a cultural category. First published in 1970, Gene Youngblood's influential Expanded Cinema was the first serious treatment of video, computers, and holography as cinematic technologies. Long considered the bible for media artists, Youngblood's insider account of 1960s counterculture and the birth of cybernetics remains a mainstay reference in today's hypermediated digital world. This fiftieth anniversary edition includes a new Introduction by the author that offers conceptual tools for understanding the sociocultural and sociopolitical realities of our present world. A unique eyewitness account of burgeoning experimental film and the birth of video art in the late 1960s, this far-ranging study traces the evolution of cinematic language to the end of fiction, drama, and

realism. Vast in scope, its prescient formulations include "the paleocybernetic age," "intermedia," the "artist as design scientist," the "artist as ecologist," "synaesthetics and kinesthetics," and "the technosphere: man/machine symbiosis." Outstanding works are analyzed in detail. Methods of production are meticulously described, including interviews with artists and technologists of the period, such as Nam June Paik, Jordan Belson, Andy Warhol, Stan Brakhage, Carolee Schneemann, Stan VanDerBeek, Les Levine, and Frank Gillette. An inspiring Introduction by the celebrated polymath and designer R. Buckminster Fuller—a perfectly cut gem of countercultural thinking in itself—places Youngblood's radical observations in comprehensive perspective. Providing an unparalleled historical documentation, Expanded Cinema clarifies a chapter of countercultural history that is still not fully represented in the arthistorical record half a century later. The book will also inspire the current generation of artists working in ever-newer expansions of the cinematic environment and will prove invaluable to all who are concerned with the technologies that are reshaping the nature of human communication.

Illustrations: 2 B/w Illustrations and 54 Graphs Description: Rasa, as an aesthetic experience, has always been a dominant feature of art and art criticism in India. This study examines rasa as related to Indian music, specially the raga. A new approach has been made for understanding the complex issue of raga-rasa relation, wherein, theories and tools of modern scientific technology have been employed. This may perhaps be the first work in recent times to examine the aspects of intonation and melodic movement in the actual performance context, using very sensitive computer software. A specially innovative section of the book deals with a detailed comparison between Indian and Western viewpoints on the issue of music and emotion. The exhaustive literature survey presented on the subject of raga-rasa provides excellent source material on the subject. It includes the historical evolution of rasa as applied to various aspects of Indian music. Although no specificity in terms of a particular rasa can be attached to the aesthetic experience associated with a raga, this study reassures that the principles inherent in a raga and their aesthetic capabilities are not mere theoretical norms but a reality leading to the blissful experience of rasa.
