 Aerodynamics - by L J Clancy - Year 2006 - Mall Of Aviation  
 Aerodynamics, from Greek  $\alpha\eta\rho$  aero (air) +  $\delta\upsilon\lambda\alpha\mu\iota\kappa\acute{\eta}$  (dynamics), is the study of motion of air, particularly as interaction with a solid object, such as an airplane wing. It is a sub-field of fluid dynamics and gas dynamics, and many aspects of aerodynamics theory are common to these fields. The term aerodynamics is often used synonymously with gas dynamics, the difference being that ...  
 Aerodynamics - Wikipedia  
 Aerodynamics 1 Aerodynamics A vortex is created by the passage of an aircraft wing, revealed by smoke. Vortices are one of the many phenomena associated to the study of aerodynamics. The equations of aerodynamics show that the vortex is created by the difference in pressure between the upper and lower surface of the wing.
