*TRAC: Trends in Analytical Chemistry, Volume 7* provides  
information pertinent to the trends in the field of analytical  
chemistry. This book discusses a variety of topics related to  
analytical chemistry, including biomolecular mass spectroscopy,  
affinity chromatography, electrochemical detection, nucleosides,  
and protein sequencing. Organized into 63 parts encompassing  
158 chapters, this volume begins with an overview of the  
significance of quality and productivity in the analytical  
laboratory. This text then presents a comprehensive review on  
alcohol dehydrogenases, immobilization, and applications in  
analysis and synthesis. Other chapters consider the various tests  
for determining the excellence of quantitative assays available for  
analysts to utilize for method validation. This book discusses as  
well the primary challenge of neuropharmacologists to relate  
physiological functions to the many ligand binding sites identified  
in brain tissue. The final chapter deals with the fundamentals and  
applications of biosensors. This book is a valuable resource for  
analytical chemists, chemical engineers, clinical chemists,  
neuropharmacologists, and scientists.

 Pedagogical Content Knowledge (PCK) has been adapted,

adopted, and taken up in a diversity of ways in science education since the concept was introduced in the mid-1980s. Now that it is so well embedded within the language of teaching and learning, research and knowledge about the construct needs to be more useable and applicable to the work of science teachers, especially so in these times when standards and other measures are being used to define their knowledge, skills, and abilities. Re-examining Pedagogical Content Knowledge in Science Education is organized around three themes: Re-examining PCK: Issues, ideas and development; Research developments and trajectories; Emerging themes in PCK research. Featuring the most up-to-date work from leading PCK scholars in science education across the globe, this volume maps where PCK has been, where it is going, and how it now informs and enhances knowledge of science teachers' professional knowledge. It illustrates how the PCK research agenda has developed and can make a difference to teachers' practice and students' learning of science.
